

## **Marquee**

Can be used to control a scrolling marquee on your website. These marquees are normally located under the header on a website. Marquee placement is determined during the design phase of a project and set-up during development.

### ***Marquee Tab***

Lists the existing marquee on the website.

#### *Creating a Marquee*

1. Click on New (the first time only.)
2. Enter the marquee name; this is not what displays on the site but how it is referenced within the ISM.
3. Marquee Text – the text that scrolls
4. Select the direction you want the marquee to scroll.
5. Select the Behavior (scroll, slide or alternate)
6. Select the amount of time between the text repeating (you can leave it at “0” and it will still work.
7. Select how far you want the text to move (you can leave it at “0” and it will still work.
8. Enter the number of times that you want the marquee to scroll.
9. Save.
10. NOTE: Once a marquee is created it is only edited. If you accidentally delete the marquee you will need to contact customer service or open a task to have the new marquee linked to the site.
