

## **Dev Website Link**

This link is used to view the Development site, changes will appear immediately to this site. The Development site is not live, and the only way to access it is to be logged into the ISM.

## **Live Website Link**

This link will open your current live website in a new window, change will post to this site within 15 minutes.

## **ISM Button**

### **Home**

This is a link that takes you back to the ISM 3 home page for your site. This is the page that has the quick links for adding items, your weather information, and Infinity contact information.

### **My Websites**

This link will take you to a page that lists all the websites that you have access to. Type the name of the website you want to work on in the box, and it will list it below. Then click on the name of the website to access the site's ISM to make changes/additions to the site. This will only list the sites you have access to and that you can work on. Most clients will only have access to one site, but in some cases, they will have access to multiple sites

### **Preferences**

This takes you to a page where you can update your personal preferences for working in the ISM. You can enter your personal information, set the ISM session timeout, select your ISM language, and select what type of text editor you'll use when working in components that have text areas.
